

$\frac{3}{4}'' = 1'$
North Wall W1, W2, W3, W4

W1	N1
W2	0

to SD line
(end W3 is 2' higher than
W1/N1 corner)

3-4 rubble
top

the only N1
west wall
profile

middle W4
is
filled
with
rubble

end W3
has 3-4 rubble
top

end of W2 has
4 levels rubble
top

small but definite separation
between 60-70" level & 52" level
just above

7-9 rubble in level in front of W1
time the end of W1, probably mass of bones

midpoint thru 72"
level as
bottom level is

SD line
is
filled
with
rubble

all level
is
filled
with
rubble
